PREFAȚĂ

Volumul V este primul din seria celor patru volume (V, VI, VII, VIII) care tratează problema *profesiunilor* pe baza rezultatelor Recensământului General al Populației din 1930. Cuprinsul acestor patru volume privind *statistica profesiunilor* este următorul:

Vol. V, *Situația în profesie, sex, grupe de vârstă, gradul de instrucție și neam pe 15 clase de profesiuni.*

Vol. VI, *Populația pe clase (15 clase) și grupe de profesiuni (124 grupe) după situația în profesie și sex; pentru fiecare județ (mediul rural) și oraș.*

Vol. VII, *Populația pe clase și grupe de profesiuni (42), după grupe de vârstă și sex, instrucție și neam; situația în profesie a activilor pentru populația totală a fiecărui județ (întrunit).*

Vol. VIII, *Profesiuni individuale pentru fiecare județ (întrunit pe sexe) și oraș.*

Este suficientă o simplă privire asupra materialului cuprins în aceste patru volume, care tratează detaliat datele care caracterizează structura socială a României Mari, pentru a se invedera faptul că prelucrarea acestor date a constituit o performanță cu totul excepțională pentru cunoașterea țării, în condițiunile deosebit de grele în care Institutul Central de Statistică a fost nevoit să lucreze, luptând neîncetat pentru a putea termina și tipări aceste volume.

Tabelele statistice cuprind date corelate asupra elementelor celor mai caracteristice ale statisticii profesiunilor.

Aceste corelațiuni au implicat întrebuințarea de cartele statistice și de mașini statistice. Cartelele există, ele au fost procurate și perforate, dar tabelarea lor nu s'a făcut pe cale mecanică ci pe cale manuală, prin numărarea bucată cu bucată a cartelelor, pentru fiecare corelațiune.

Această muncă istovitoare și înceată, s'a făcut manual pentru motivul că Institutul Central de Statistică al României, este singurul Institut de acest fel din întreaga lume, care nu dispune nici măcar de o singură mașină de tabelat.

Oricât de dureros este să arătăm acest lucru, mărturisirea se impune, pentru că cei care nu cunosc dimensiunile gigantice ale unei lucrări de recensământ, este firesc să nu înțeleagă dece acest capitol al rezultatelor Recensământului nu a putut fi tipărit decât după zece ani.

Dacă la lipsa de mașini mai adăugăm și lipsa de personal precum și puțina stabilitate a instituțiunii, amenințată în însăși existența ei tocmai pentrucă nu i s'a apreciat rostul, se va înțelege, dece instituția care nu avea decât un singur înțeles, de a publica rezultatele în timpul cel mai scurt posibil, nu are nici o răspundere pentru întârzierea apariției acestor volume.

Consecvent principiului ce ne-am fixat, nu vom analiza la acest loc cifrele statistice cuprinse în volum, ci vom expune numai metoda de lucru și metoda de publicare.

Chestionarul de recensământ a cuprins următoarele întrebări, privitoare la problema profesiunilor:

1. Profesia principală (ocupația, meseria, funcțiunea de căpetenie).
2. Situația în profesie.
3. Instituția sau întreprinderea unde se exercită profesia.
4. Pentru lucrătorii fără ocupație, cauza lipsei de ocupație.
5. Profesia secundară (lăturalnică).

Răspunsurile la aceste întrebări ne-au dat putința de a face o amănunțită prelucrare a datelor statistice, care alcătuesc volumele V—VIII ale Recensământului.

Acest material constitue abia un rezumat al materialului existent în arhivele Institutului nostru, material nepublicabil din cauza volumului mare al tabelelor, a căror tipărire ar fi cuprins 89 volume de câte 1000 pagini. El va rămâne însă, în formă de manuscris la dispoziția cercetătorilor, spre consultare.

Tehnica de aranjare a materialului cuprins în volumul de față este următoarea:

La pagina XIV a acestui volum, prezentăm cele trei grupuri principale de populație: *populația*

totală (pag. XIV—XXI), *populația activă* (pag. XXV—LV) și *populația pasivă* (pag. LVI—LXXVI) pe mediul urban și rural și pe clase de profesiuni.

Orașele sunt clasificate atât pe județe cât și separat, în ordine alfabetică. Prezentarea procentelor populației în fiecare clasă de profesiuni, face această tabelă deosebit de utilă. Dacă am repetat și cifrele absolute, am făcut-o pentru a ridica valoarea documentară a lucrării și pentru a facilita întrebuințarea ei când se cere o documentare rapidă, care nu îngădue cercetătorului și cu deosebire omului de Stat să facă singur calcule. Și chiar dacă cineva le-ar face, executarea lor ar împiedica putința de orientare generală și cu detalii suficiente, într'un domeniu care constitue însăși miezul structurii sociale a Țării Românești.

Credem, că în acest domeniu orice detalii și prezentări statistice corelate, pot fi de un folos considerabil pentru aceia, care au răspunderea dirijării sistematice a României.

In continuare apar cifrele grupurilor mari de profesiuni pe provincii istorice, aranjate în trei tabele:

In prima, cifrele sunt corelate cu *Situația în profesie.* Ele sunt date atât în valori absolute cât și în proporție la 100 din populația activă, pentru fiecare situație în profesie, separat (pag. LXXVII—LXXXIV).

In tabela a doua, aceleași clase de profesiuni, pe provincii, sunt corelate cu *Știința de carte* a populației în cifre absolute și în proporții la 100 activi (pag. LXXXV—XCII). Într'o viitoare lucrare va trebui să se prezinte situația științei de carte și după situația în profesie.

A treia tabelă cuprinde distribuția populației pe *Neamuri* pentru fiecare clasă principală de profesiuni, atât în cifre absolute cât și în procente (pag. XCIII—C).

Urmează apoi aceleași date, detaliate pe cele 71 județe, dar fără cifrele absolute pentru fiecare situație în profesie, știință de carte și neam (pag. CI—CXCVI).

In fine, pe o întindere de 420 pagini, numerotate cu cifre arabe, apar datele detaliate ale fiecărui județ și oraș, precum și tabelele recapitulative pe județe, provincii istorice și pe întreaga Românie, cuprinzând date detaliate pe clase de profesiuni (15 clase), corelate cu situația în profesie (8 situații, plus activul și pasivul), apoi cu sexul și grupele de vârstă pe sexe (6 grupe), cu gradul de instrucție (7 grade, plus totaluri, analfabeții și copii sub 8 ani) și în fine neamul (12 neamuri).
